

Archivist Report for Panel 61 Assembly Meeting October 1-3, 2021

I met with Diane M., the Panel 58 Archivist, and she demonstrated the Archives site and the uploading of scanned documents. Due to some technical issues, we will need to meet again to ensure the scanning process is occurring correctly.

I have met with my assistant at the storage unit and have started sorting through remaining plastic bins to inventory what is left to scan and what textile items will need to remain stored. It is truly an honor to review the notebooks that those in past service have documented for the Area 9 history.

I have spoken with the storage facility and hope to be moving to a smaller (and cheaper) unit for storage as soon as one is available.

Once the technical issues are resolved, I will need to meet with the Panel 61 Technology Coordinator to discuss and review the Archives site and clarify the storage functions of the website. This meeting may need to occur at the February AWSC and face-to-face.

In humble service,

Tina M.
Archivist Panel 61
